HOW TO ORDER

It is a very simple matter to order goods by mail from this Catalog. Order by number any article you may wish, and it is also well to name number of page on which the article appears, as well as the price. We prepay transportation charges to all parts of the world and guarantee safe delivery.

TERMS. Our prices are low and the same to all. Our terms are net, cash in advance with order.

HOW TO ORDER. Great care should be exercised in writing orders. Do not fail to give your full address, state, town, and if necessary the street and number; it is absolutely necessary to prompt service.

If your express address is different from your mail address, give that also, as packages too large or too heavy for mailing must be sent by express or freight. If you are many miles from an express office and order heavy goods, tell us so. Tell us that the package can only be delivered by mail. If you are away from home when ordering, give your permanent as well as your transient address.

HOW TO SEND MONEY. Remit by post-office money order, express money order, bank draft, or by sealed registered letter, with money carefully wrapped. We will accept two-cent United States stamps in amounts not exceeding one dollar. Do not send stamps if you can conveniently remit in any other way. Do not send us foreign stamps or money. Do not send personal checks that have not been certified by your bank, unless you are willing to have us hold the order until the check is collected. This is for your protection as well as our own.

OUR SYSTEM has been so perfected, and our organization is so thorough, that very few mistakes occur; but, as you well know, no one is infallible—mistakes will occasionally be made. We, however, hold it a privilege to correct them promptly and courteously—we do not want one error to go uncorrected. If a mistake is made in your order, write us about it and co-operate with us in adjusting the matter.

GIFTS SENT TO ALL PARTS OF THE WORLD. We shall be pleased to send any articles intended for gifts to any address. All tags and prices will be carefully removed. The articles will be thoroughly inspected and neatly packed, also any card you may desire will be enclosed. Prompt prepaid delivery will be made. Absolute satisfaction is guaranteed.

C. O. D's. If not convenient for you to send remittance with your order, it will be sent C. O. D. on request to any address in the United States. C. O. D. orders are also accepted for any address in Porto Rico, Philippine Islands, Canal Zone and Hawaiian Islands, provided 25% of the total amount of order is enclosed. Money refunded if not entirely satisfied.

ORDERS TO BE ENGRAVED. Kindly send remittance covering cost of goods on all orders where engraving is desired. Goods "Made special to your order" should also be prepaid.

Engraving We have endeavored on the following pages to clearly state when engraving is done FREE or when there is an extra charge for same. When nothing is mentioned about engraving charges, if you desire the article to be engraved with initial or monogram, prices are as follows: Script Letters, 3 cents per letter; Old English, 10 cents per letter; Small Monograms, 30 cents each; Large Monograms, 75 cents each. Be careful in giving correct initials clearly.

Every order sent us is accepted with the understanding that if the goods we send you are not found satisfactory on arrival, they may be immediately returned to us (unless specially made or engraved to order) and we will refund the money on receipt without argument or delay.

Repairing We have a perfectly equipped repair department with unequalled facilities for restoring and refinishing broken jewelry, replacing lost stones of every variety. We employ skilled watchmakers for repairing and adjusting watches, guaranteeing their fine timekeeping. Repairs should be sent to us by registered mail or express and we will notify you of the charges. If our estimates are satisfactory to you, we will, on receipt of your order, proceed with the work, returning it to you promptly.

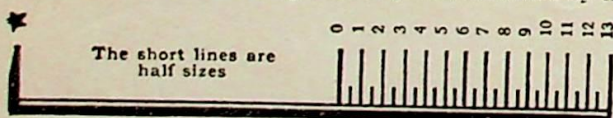

Our prices are the lowest and our work the best.

WE WILL REMOUNT YOUR DIAMONDS IN NEW SETTINGS

Styles in Jewelry have their vogue and change from time to time. Platinum and White Gold are in great demand for Rings, Pendants, Lavalliers, etc. Your jewelry can be made into the very newest and up-to-date styles. Our facilities for this work are unequalled. In our catalogs are illustrated the latest designs. Occasionally even our immense assortments fail to contain just what you are looking for. However, you need but suggest what you want, to have our designers submit you a sketch free of charge, with estimate of cost, without any obligation to purchase. Upon your approval our factory will fill your order at the lowest possible manufacturing cost.

How to Obtain Size of Ring

Ring sizes may be determined by the following Ring Measure:

Measure finger with narrow strip of paper. Place the paper on the scale, beginning with the "star" on the left to the numbers on the opposite end. When no size is stated, we will send the average size—about 6½ for ladies and 9 for men.

You may order the ring size from any card or gauge. Our rings are all standard sizes and we guarantee a perfect fit.

Our Reliability

We receive daily from all quarters of the globe many letters that invariably mention the satisfactory service rendered by the house of Jason Weiler & Sons, as well as the high quality of its merchandise and the uniform savings in price. Gentlemen:—It is in reality complimenting myself to thus present to you my sincere thanks for your prompt, most courteous service and attention to my small initial purchase.

The ring was a pleasant surprise as to size, brilliancy and careful mounting, and decidedly a bargain in cost, for it was readily appraised at \$150.00, when shown here,—considerably more than your price.

Please be advised that I am at present making another complete survey of your most excellent catalogues, preparatory to the selection of a "life mate" for the solitary, order for which I will forward at an early date.

It is indeed a pleasure to know the assurance of such a splendid, reliable business service by mail and at such a distance.

Very truly yours,

C. E. Rochester.

I want to get a pair of ear rings made with high-grade diamonds (about 1-carat each) and gold screw setting. From the schedule appearing in your ad, I believe the enclosed draft will cover the cost. However, I leave it entirely to you to get me the best with that money.

Gentlemen:—I received my watch from you today, and I certainly do appreciate the way you have fixed the bracelet so that it will stay on my wrist.

It is easy to see why your firm have so established yourselves with your many customers: You are so particular about the little things.

Your courtesy in connection with repairing my watch, and this little matter of adjusting the bracelet with a double closed clasp, will not be forgotten. A satisfied, pleased customer is the very best result that can be obtained in the business world today, no matter what line of business we may be engaged in.

Yours sincerely,

Miss E. R. Jones.

Jason Weiler & Sons, —

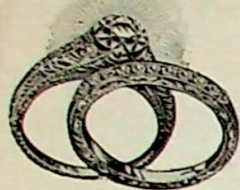

The Banquet Ring arrived just in time for Mrs. Dorrance's Birthday and proved not only a great surprise to her—but the excellent value—as all who have seen it remark—is also very pleasing to me as well as Mr. Ardmore, one of your customers here, who recommended that I send to you for the ring.

Very truly,

CHAS. DORRANCE.

The Love-lock Diamond Ring

TRADE
MARK
REGISTERED

HERE is a charmingly new idea in ring construction—an Engagement and a Wedding Ring that interlock in such a way that they become inseparable when worn on the finger. This is an exclusive patented Weiler Production appealing to everyone who has worn two rings on one finger—and who knows how difficult it is to have them fit closely together. The Love-lock Engagement Ring may be purchased separately and worn alone. At a later date the Wedding Ring can be secured and locked to the Engagement Ring as is shown at the left, so that both rings to all intents and purposes become as one. (See illustration on the right.) They may, however, be separated at any time by taking them off the finger and turning back to the position shown at the left. While being worn they have the appearance of two separate rings but stay in the proper position and are worn as one ring. An added advantage is that the Wedding Ring cannot wear down the Engagement Ring and vice versa. In fact, we feel we can now say as did our signer "At last we have produced the perfect Engagement and Wedding Ring."

For over forty-eight years the house of Jason Weiler & Sons of Boston has been one of the leading diamond-importing concerns in America, selling to jewelers or direct to the public by mail. The great increase in our diamond sales has made necessary the establishing of our own foreign purchasing agencies in London, Paris, Amsterdam and Antwerp.

These agencies prove their ability at all times to obtain the finest genuine Diamonds at the lowest possible market prices. So successful is the diamond-buying power of the Weiler organization that we have actually shipped diamonds from our Boston headquarters to customers in Europe. WEDDING RINGS

Platinum

Jason Weiler & Sons' Wedding Rings are universally recognized the best made. Their wearing qualities are not only for a lifetime, but they may be handed down from generation to generation with all the loving traditions so greatly treasured in the home and family. While they have the solid gold intrinsic value of other makes, they are vastly different in many important details, and must not be confused with the ordinary wedding rings. Each ring is made one piece throughout, no seam, solder or joint. This method of making not only produces a ring without a seam but the gold is so thoroughly hammered and rolled that it is of unusual density and hardness, and will wear forever. All the latest styles of fancy engraved wedding rings are shown below as well as the conventional plain pattern.

Each ring is plainly stamped inside with the Karat, "14K" or "18K." If ordered especially, we make Ladies' Ring No. 30552N 22K solid gold for \$12.50, and also Men's Ring No. 30564N for \$15.00. We engrave initials and date in wedding rings free. We must know the size you want when you order. If you do not state the size, we will send the average size which is 9 for men and 6 for ladies.

Be sure to state Ring Number, Size, and Karat Quality

The only difference between the Ladies' and Men's Wedding Rings is in the finger sizes. The Ladies' sizes vary from size three to eight and the Men's from eight to thirteen. Half and quarter sizes can be furnished. We illustrate the different widths of the Tiffany styles as well as the widths of the more conservative oval patterns.

LADIES' 14K. SOLID GOLD RINGS, MOUNTED WITH BOTH GENUINE AND SYNTHETIC STONES

THE following illustrations show the exact sizes and styles of an extraordinary group of high-grade Solid Gold Rings. Under each illustration we have listed the various stones in which the different style rings can be furnished. Our Paris Agency gives us exceptional advantages in furnishing both the genuine and synthetic stones, for the Parisian market is headquarters for all the world, particularly for the colored stones. The selection of a stone should be a matter of taste and not a question of whether it be genuine or synthetic stone. It should be borne in mind that synthetic stones are gems made of the natural elements of genuine stones chemically compounded by the extreme heat of the electric furnace, following exactly the same method Nature used in the production of real gems. To class artificially formed stones inferior to natural stones is but baseless prejudice. They differ from the latter in no respect save in their origin, having been produced under artificial instead of natural conditions. Synthetic Rubies and Sapphires are as hard as the genuine, will last forever and are as true and brilliant in color and as perfect in quality. They are admired by all who see them, and we are positive that you will obtain equal pleasure and enjoyment from wearing the synthetic as in wearing the genuine. Be sure to state the ring size desired.

The Aquamarine

From the sea this superb gem borrowed its wondrous hue—a pale bluish green, luminous and permanent—and from the diamond its brilliancy. Then nature combined the two in one of the most beautiful of the precious stones—THE AQUAMARINE.

Our Paris Office selects the Aquamarines that are mounted in the Rings illustrated on this

page. We guarantee that each stone is perfect in cutting and color. All stones are securely set and the ring designs are exquisitely wrought by our skilled artisans in all of the very newest styles.

SOLID GOLD RINGS MOUNTED WITH FINE CULTURED PEARLS

The genuine pearls the production of a shellfish. Twentieth Century methods have enabled man to cultivate tiny foreign particles in the pearl oysters which in time result in what is known as "Cultured Pearls." Their beauty and intrinsic value are as great as that which the pearl divers of the Orient seek in deeper waters. The above are the finest specimens of the genuine cultured pearls that we have ever imported and are extraordinary values for the money.

We have been selling these watches for many years, and our files are full of the highest testimonials of satisfaction and pleasure from thousands of wearers of Jason Weiler & Sons' watches. Although we price other makes, we are certain of our guarantee in recommending the Jason Weiler & Sons' Watches.

The highest-priced workmen who have had lifelong experience in watchmaking produce the Jason Weiler & Sons' watches.

The best materials only are used — hence this remarkable guarantee.

Inspection and testing are so thorough that every watch is perfect before leaving the factory.

Temperature adjustment is another tedious detail. Watches are tested in a refrigerator recording about 35 degrees and in an oven of 100 degrees. The balance wheels are altered until the watch times accurately in any temperature.

12-size 17-Jewel Jason Weiler & Sons' Movement. Ruby jewels in settings, patent regulator, Breguet hairspring, adjusted to temperature, double roller escapement, compensating balance, steel escape wheel, exposed winding wheels, bridge model, and beautifully damaskeened.

JASON WEILER & SONS' WATCHES
ARE STANDARDIZED

Any Jeweler or Watchmaker can repair a Jason Weiler & Sons' Watch, as it is a standard make with interchangeable parts which any repair man can procure.

The following pages on which we illustrate the movements and cases and quote prices will probably interest you most. Read them carefully. No matter what watch purchase you have in mind, we can furnish it to you at a guaranteed saving of at least one third on usual retail prices. Thousands of customers have written to us that actual comparisons have proven this fact. Whatever watch you order is sent on approval. We insist upon absolute satisfaction. If not satisfied on receipt of watch, send it to us, and your money in full will be courteously returned to you at once.

Then the adjustment of isochronism, which means the regulating of the hairspring so that the watch will keep as accurate time after it has been running thirty-six hours and is nearly run down, as when it has just been wound up.

The regulation and adjustment of the Jason Weiler & Sons' watches are most interesting. Where this all-important feature in their making is carried on, one can see tray after tray containing watches, each lot running in a different position or angle. As variations are noted or irregularities found, experts correct them by adjusting the balance wheels; so that all finally run exactly alike, whether standing on edge or lying flat. This process sometimes takes three or four weeks to complete to the perfection standard. So positive are we of its perfection that we stake our reputation on its accuracy and reliability and allow you to be the judge.

12-size 19-Jewel Jason Weiler & Sons' Movement. Ruby jewels in settings, patent regulator, Breguet hairspring, adjusted to heat, cold and three positions, compensating balance with timing screws, steel escape wheel, exposed winding wheels, bridge model, handsomely damaskeened.

Our Imported Watches are all made under American supervision, and according to American methods, by the most skilled watchmakers — and are fully guaranteed to be of perfect construction and absolutely accurate timekeepers.

FROM PORTO RICO

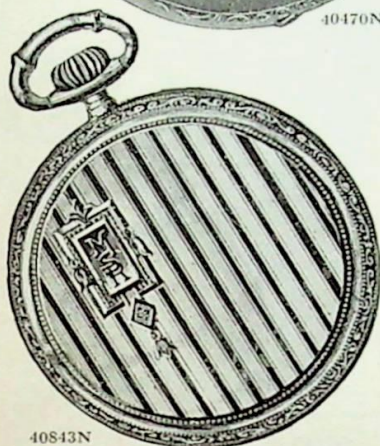

San Juan, Porto Rico.
Jason Weller & Sons, Boston, Mass.

Gentlemen:
You asked me to write to you six months after receipt of the Jason Weller & Sons' watch, and I take great pleasure in doing so. My friends, on account of the extreme heat here at times, complain of their watches, but the Jason Weller & Sons' watch, being perfectly adjusted, does not vary a second a month under all kinds of conditions. I can highly recommend this watch, and you can certainly count on my future orders in your line.

THIS NEW YORKER WAS GREATLY PLEASED

Jason Weiler Sons, Boston, Mass. Received the signet ring today and I wish to tell you that I am very much pleased with it. The design, as I surmised from the illustration in your catalog, is very handsome and the work of your engravers on the monogram pleases me as much as the Ring itself. You can surely count on future orders.
Manhattan Club, 71st & Broadway, New York.
Very truly, Lyman George.

We receive thousands of orders from those who have purchased from us for many years, and it's mighty gratifying. It proves that we have given good values, and that our efforts to please and accommodate our customers have made thousands of steadfast and loyal patrons.

MEN'S BELTS

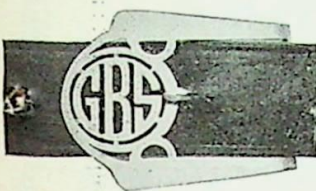

Little things make a tremendous difference in a man's appearance — and people's impression of him. A belt, the least bit shabby looking, will spoil the appearance of the finest suit.

On all except Nos. 32065N, 32068N, 32071N, 32576N and 32579N, the buckles fasten automatically without having any holes in the belt. They are most serviceable as the buckles being made in one piece will wear for years and a new belt can be furnished at any time. The prices given are for the buckle complete with black leather belt of fine quality. Pierced monogram buckles require one week to be made and we would appreciate you allowing this length of time before expecting your order. The illustrations are reduced size. The belts are regulation width, one inch. Please print initials clearly for monogram belts.

STERLING SILVER

Because of its beauty, durability and intrinsic value Sterling Tableware has always been regarded as a thing of worth. It is a symbol of prestige and an emblem of refinement.

The Adam

is one of the most beautiful creations of the silversmith's art and will beautify the table beyond comprehension. The signet embodied in the design is especially adapted for the engraving of an initial.

The Carthage

The most beautiful of the hammered designs, with the raised edge and plain signet for engraving — one of the most desired of the dull platinum finished designs.

The Princess Mary

Long flowing lines, graceful as a bridal veil — shapely shield and crown supported by skillfully cut ornaments, all combine to form a pattern of exquisite beauty to adorn the table.

The Bostonia

is a severely plain heavy-weight design suggestive of the simplicity and beauty of the early New England household.

The Orange Blossom

is one of the very latest patterns, suggestive of the wedding day. The vogue of this design in both the engagement and wedding rings links this pattern up in a charming manner as an appropriate wedding gift.

The William and Mary

one of the newest patterns in tableware, combining beauty with simplicity in design. It is silverware you will be proud to own and dearly cherish.

The Cortland

bright finish, is perfectly plain with a raised line border — a pattern that will always maintain its artistic value and never go out of style.

Chateau-Thierry

is an adaptation of the French style of Louis XVI. The graceful outline, the dainty ornamentation and fineness of proportions render a pattern of uncommon charm and beauty.

The Love-lock Diamond Ring

TRADE MARK REGISTERED

These diamond mounted Love-lock Engagement and Wedding rings are beautiful new creations of our highly skilled artisans who have added still more charm and sentiment to the wearing of an engagement and wedding ring in combination. The illustration at the left shows the rings being locked together. The lower illustration shows them locked together as they appear when worn on the finger.

The Love-lock Engagement Ring is made with an original interlocking design patented by Jason Weller & Sons, so that when worn with the Love-lock Wedding Ring they are held closely together in the proper position on the finger. The engagement ring may be worn separately, however, until the Love-lock wedding ring is purchased later.

The Love-lock Wedding Ring is all Platinum and mounted with ten perfectly cut blue-white Diamonds half way around the ring. The remainder of the Ring is richly carved in a blossom design to match the Engagement Ring. These Rings may be purchased separately and worn either alone or in combination with each other.

The richly-pierced open work and the exquisite hand carving in which the smaller diamonds on the sides are securely embedded, add much to the handsome appearance of these rings.

This necklace is of the same beautiful color and duplicates in cutting and general appearance the most expensive genuine amber. It is exceptionally light in weight and is fashioned in the graduated style, 32 inches long. The Ancients considered amber to be a guard against sickness, and even today many wearers of amber are prone to believe in the old superstition. The Vice-President's Favorite Pipe

This is the original and genuine Lyon Pipe — the style that General Dawes smokes. We consider it one of the best pipes we have seen for years. It holds an extra large amount of tobacco and is held in the mouth with great ease. Breaking in a new pipe is always considered an unpleasant experience. This is overcome by the lining on the inside of the bowl, a secret compound. This lining being fireproof prevents the bowl from burning out. The smoke is first drawn into the cold chamber and condenses rapidly. Having lost most of its moisture, the smoke rises through the 20-inch spiral coil and enters the dry chamber which is heated by the burning tobacco, and you obtain a clean, cool smoke. Genuine Italian Breviere with Bakelite mouthpiece. A very special value. **\$2.50**

Here are the Main Features.

The case is covered with black patent leather fabricoid and has metal bound corners. It contains a nickel luncheon box, four white enamel cups, four white enamel plates, four knives, four spoons, four forks and has a space to accommodate a vacuum bottle. Size of the case when closed is 15 1/2 by 12 by 6 inches. Case and outfit complete not including vacuum bottle. **\$11.85**
